SENIOR PRODUCT & AI-DRIVEN PLATFORM LEADER – CONNECTED

Senior Product Owner and automotive software leader with **13.5+ years of experience** across **OEMs, Service , and EV startups**. Proven expertise in **Software Defined Vehicles (SDV), connected platforms, OTA ecosystems, and Industry X.0-enabled smart manufacturing systems**. Owning products end-to-end from concept and backlog definition through development, deployment, and operations

Hands-on experience **building AI-native solutions** including Agentic RAG systems, AI-powered ALM platforms, and rapid application development using generative AI. Strong background in product lifecycle ownership, platform architecture

Experienced in architecting end-to-end digital product ecosystems spanning manufacturing intelligence at EMS & OEM, cloud-connected platforms, vehicle software, and lifecycle analytics. Strong background in agile delivery, Product & Process governance, and global cross-functional leadership.

CORE SKILLS

AI & Digital Engineering: Generative AI, Agentic RAG, AI-driven ALM

Product Ownership & Agile: Product Backlog Ownership, User Stories & Acceptance Criteria, Sprint Planning & Reviews, Backlog Grooming

Connected Vehicle & SDV: Infotainment, Telematics, OTA Strategy, Digital Keys, V2X Readiness, Software-Defined Vehicles

Industry 4.0 & Smart Manufacturing: Cyber-Physical Systems, Manufacturing Data Validation, Digital Traceability, MES Integration

Cloud & Data: Azure Exposure, IoT Platforms, Vehicle Telemetry, Vehicle Data & Lifecycle Analytics

Leadership & Delivery: Global Stakeholder Management, Cross-functional Teams, Vendor & Partner Management

PROFESSIONAL EXPERIENCE

Matter Motors Works Pvt. Ltd. – Associate General Manager, Products.

Jan 2022 – Present

- AI-Powered Automotive ALM Platform
 - Automated PRD → Requirements → Past lesson Learnt → code scaffolding → Testing lifecycle aligned with ASPICE, ISO26262, ISO21434/AIS189
 - Generated system/software requirements and test cases
 - Built closed-loop learning from field failures
- Agentic RAG System for Issue Intelligence
 - Multi-agent RAG system for lifecycle issue analysis
 - Context-aware debugging and role-based responses
- AI-Generated Android Application
 - Built Android app using AI-assisted development (vibe coding)
 - Ready for Play Store deployment
- Product owner for enterprise-scale **connected vehicle platforms** including clusters, body systems, digital keys, OTA, and cloud services
- Defined and executed **SDV and OTA strategy**. Build the Digital backbone for OTA deployment in field.
- Owned full **product Strategy & roadmap along with product lifecycle** from design and development to deployment and operations
- Established connected systems operating model; led cross-functional and vendor ecosystems
- Cyber-Physical Manufacturing & Digital Validation Architecture

- Designed manufacturing validation architecture for EV vehicle, Powertrain and battery pack production lines enabling Industry 4.0 transformation
- Established sensor-driven data integrity checkpoints across cell grading, module assembly, pack integration, and vehicle final assembly
- Developed rule-based validation engines to automatically block out-of-spec builds before progression
- Enabled VIN-level digital traceability linking manufacturing parameters to connected cloud systems for lifecycle diagnostics and warranty analytics

Maruti Suzuki India Ltd. – Manager, Connected Infotainment & Branded Audio

Sep 2018 – Dec 2021

End-to-End Product & Platform Strategy

- **Strategic Roadmap:** Owned technology roadmaps for Connected Infotainment and mobile apps for India and global markets, ensuring scalability and market differentiation.
- **Cost Optimization:** Delivered ₹720Mn+ in savings through structured Value Analysis/Value Engineering (VAVE) and platform synergies.
- **New Product Introduction:** Spearheaded the first Branded Audio System in the Suzuki-Maruti portfolio, managing transition from POC to full-scale production.

Mahindra & Mahindra – Senior Engineer, Infotainment & Connectivity

Dec 2016 – Aug 2018

Connectivity & IoT Pioneering

- **V2X Concepts:** Contributed to India's first connected platform and developed remote Infotainment & HVAC vehicle control via mobile applications.
- **Process Efficiency:** Developed telematics and IoT solutions for tractors and heavy equipment, improving fleet optimization and process efficiency.

KPIT Technologies – Senior Engineer, Automotive Connectivity

May 2015 – Oct 2016

Global Program Delivery

- **Validation Frameworks:** Delivered automotive connectivity validation for North American OEM programs.
- **Operational Efficiency:** Led offshore teams to establish one of the most efficient and high-performing delivery centres within the organization.

Mahindra & Mahindra - Assistant Manager

Aug'12 - Apr'15

- Contributed to **India's first connected infotainment platform** for Mahindra vehicles.
- Contributed to telematics **and IoT solutions** for remote diagnostics, predictive maintenance, and fleet optimization for tractors, CV & Construction Equipment; improving operating profit & customer satisfaction.

EDUCATION

M.Tech – Automotive Electronics, BITS Pilani | CGPA 8.35 | 2022–2025

B.Tech – Electronics & Communication Engineering, CUSAT, Kochi | 2008–2012

PATENTS & PUBLICATIONS

- **12 Granted Patents** in Connected Vehicles and Digital Mobility
 - SAE Technical Paper: *Smart Play Studio – A Connected Infotainment Development*
-

ADDITIONAL INFORMATION

Languages: English, Hindi

Domains: Agentic AI, Agentic RAG, Connected Vehicles, SDV, EV Platforms, Digital Mobility

International Experience: Global OEM programs, cross-cultural teams
