

PANKAJ KUMAR BHARTI

Ahmedabad, India | +91 96772 01092 | pankaj.bharti10@gmail.com | LinkedIn | GitHub

PRODUCT LEADER | AI PLATFORMS | CONNECTED MOBILITY | EV SOFTWARE | OTA | SDV

PROFESSIONAL SUMMARY

Product leader with 13.5+ years across automotive OEMs, EV platforms, connected vehicle systems, OTA, telematics, manufacturing intelligence, and AI-native engineering products. Strong at converting technical complexity into product strategy, roadmap decisions, structured requirements, and execution across engineering, validation, manufacturing, and leadership teams.

Built and led products spanning AI-native automotive ALM, agentic issue intelligence, connected vehicle systems, manufacturing validation, infotainment, telematics, and software-defined mobility. Combines product ownership depth with standards-aware engineering fluency across ASPICE, ISO 26262, ISO 21434, and AIS 189-oriented workflows.

CORE SKILLS

Product Leadership: Product Strategy, Platform Product Management, Roadmapping, Roadmap Prioritization, Backlog Ownership, Requirements Management, Program Execution, Stakeholder Management, Cross-functional Leadership

AI & Platforms: Agentic AI, Agentic RAG, AI-assisted Development, ALM Workflows, Requirements Automation, Issue Intelligence, Engineering Productivity

Connected Vehicle & EV: Connected Vehicles, OTA, Digital Keys, Software Defined Vehicles, Telematics, Infotainment, Vehicle Cloud Services

Manufacturing & Data: Traceability, Rule-based Validation, IoT Platforms, Vehicle Analytics, Cloud Integration, Quality Systems, Standards-driven Delivery

PROFESSIONAL EXPERIENCE

Matter Motors Works Pvt. Ltd. - Associate General Manager, Products

Jan 2022 - Present

- Led product strategy for an AI-native automotive ALM platform that converts PRDs into structured requirements, code scaffolding, and test artifacts aligned with ASPICE, ISO 26262, ISO 21434, and AIS 189 workflows.
- Built an agentic issue-intelligence system for grounded lifecycle debugging, root-cause analysis, and role-based responses across product, software, and validation teams.
- Owned roadmap definition for connected vehicle systems spanning clusters, body systems, digital keys, OTA, and cloud-connected product services.
- Architected VIN-level manufacturing validation and digital traceability workflows across EV, powertrain, and battery-pack lines to move quality enforcement earlier into production flow.
- Delivered an Android application through AI-assisted development workflows, demonstrating faster iteration across product definition, build, and validation cycles.

Maruti Suzuki India Ltd. - Manager, Connected Infotainment and Branded Audio

Sep 2018 - Dec 2021

- Owned technology roadmap decisions for connected infotainment and companion mobile applications across India and global-market programs.
- Delivered more than Rs 720Mn in savings through value analysis, value engineering, and platform synergies.
- Launched the first branded audio system in the Suzuki-Maruti portfolio from concept alignment through production execution.

PROFESSIONAL EXPERIENCE (CONTINUED)

Mahindra and Mahindra - Senior Engineer, Infotainment and Connectivity

Dec 2016 - Aug 2018

- Worked on early connected-vehicle product features, including remote infotainment and HVAC control through mobile applications.
- Developed telematics and IoT solutions for tractors and heavy equipment supporting fleet optimization and operational efficiency use cases.

KPIT Technologies - Senior Engineer, Automotive Connectivity

May 2015 - Oct 2016

- Led execution across automotive connectivity validation programs for global OEM product lines.
- Helped establish an offshore team model for predictable delivery, defect handling, and quality execution.

Mahindra and Mahindra - Assistant Manager

Aug 2012 - Apr 2015

- Contributed to India's first connected infotainment platform for Mahindra vehicles.
- Worked on telematics and IoT solutions for remote diagnostics, predictive maintenance, and fleet optimization across vehicle and equipment use cases.

EDUCATION

M.Tech - Automotive Electronics, BITS Pilani | CGPA 8.35 | 2022-2025

B.Tech - Electronics & Communication Engineering, CUSAT | 2008-2012

PATENTS & PUBLICATIONS

- 12 Granted Patents in Connected Vehicles and Digital Mobility
- SAE Technical Paper on connected infotainment development

ADDITIONAL INFORMATION

Domains: Agentic AI, Agentic RAG, Connected Vehicles, OTA, SDV, EV Platforms, Digital Mobility, Manufacturing Intelligence

Leadership: Global stakeholder management, cross-functional teams, vendor and partner coordination

Languages: English, Hindi
